

Date: March 24, 2017
Ref.: 12-034/SRP/LET/AAE/WWI-DM/2017/037

Project: Construction, Completion and Maintenance of Salwa Dahab Mountains Water & Adventure Park at Salwa Resort, Qatar

Subject: Letter of Recommendation.

To whom it may concern,

I write this letter in recommendation for M.s/MAT LSS taking part as Hydraulics Specialist for the attractions in our ongoing project Dahab Mounrains Waterpark project. The scope of works including Engineering, supply, installation, testing and commissioning for the hydraulic systems related to the waterpark's main attraction (slides, lazy rivers, wave pools, diving pools, aquariums, etc...).

Up to the date of this letter, MAT LSS are meeting all the agreed milestones & responsibilites with the highest quality standards, I have no hesitation in recommending MAT as a specialist subcontractor for Hydraulic & Pumping equipments system for any large scale challenging projects with tight deadline.

Looking forward to complete this project successfully with them and for upcoming future coooperation in our future projects.

Regards,

For Al Ali Engineering Co. WLL
